455 West Factory Street
Wabash, IN 46992

Dear Mr. Lightner:

Re: Container Corporation of America
Disposal Site
Wabash County

This is to follow-up our phone conversation on May 5, 1986, concerning the above-referenced subject.

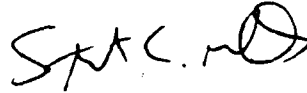

As you are aware, there are three options available to you concerning the waste material that is presently on-site. They are:

1. Collect all material and haul to a permitted landfill for disposal; or
2. compact and cover all waste with two feet of suitable soil, grade to promote drainage, and vegetate to prevent erosion; or
3. store the waste material on-site, provided that the waste is properly characterized and a complete application for a solid waste disposal facility permit is submitted to our office.

You indicated, via phone, your intentions to have the waste characterized and pursue a permit for this site. I have left a message with Mr. Charles White of this office to contact you to determine what parameters are required to properly characterize your waste. After proper waste characterization, you must submit an application for a disposal site.

If you have any questions, please do not hesitate to contact me at AC 317/243-5037.

Very truly yours,

A handwritten signature in dark ink, appearing to read "Stuart C. Miller". The signature is stylized with a large, looped "S" and a distinct "M".
